

## OligoTech® - Custom Analytical Services

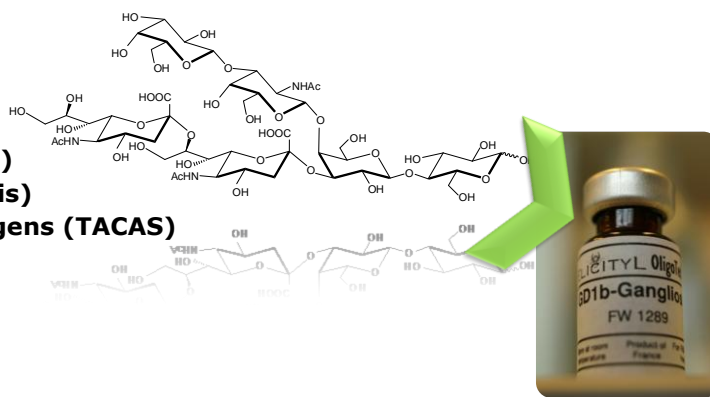

Elicityl has developed an extensive skill for providing time and cost effective analytical services of glycoproducts to accompany your projects from the first idea to final batch release.

Our know-How and capabilities in the engineering and production of complex carbohydrates will bring you support at any steps of your projects:

### Reference Standards

- Human milk oligosaccharides (HMOS)
- Blood group antigens (ABO, P & Lewis)
- Tumor associated carbohydrate antigens (TACAS)
- Standard preparation on demand

### Identity & Purity

- Determination of nature, origin and quantity of carbohydrates and related compounds
- Complex carbohydrate chromatographic profile

### Structure Elucidation

- Structural analysis, monomer composition
- Active ingredient & by-products characterization

### Product Development Support

- Raw material characterization
- Process development and analysis support
- Process optimization
- Contract Research & Manufacturing Contract
